röyale Book of Colours

A SHADE GUIDE FOR INTERIORS

röyale Book of Colours

A graphic element consisting of a white rounded rectangle with a thin black border. The top portion of the rectangle is filled with a light grey gradient. The text "Color of the Year 2024" is centered in the white area, and "Royale Play Bariq - Silver" is centered below it.

**Color of
the Year 2024**

Royale Play Bariq - Silver

The Colour of the Year, **Royale Play Bariq - Silver**, is an interaction in time, a chronicle of the past and a beacon of things to come. The iterative silver is evocative of a travelling mind, that's going forward through our virtual and physical worlds, informed by the magical stories of our childhoods, a brighter present and a future that will consciously be created by us. The infinite, illusory colour has the intimacy of a dream, beyond the light and dark, when deep in our minds we can have adventures and experiences that are almost impossible in real life. Silver is the colour of time, we are the time travelers, passing through a portal of memories and dreams to a future that is open, mesmerizing and within our grasp.

Painting Tips

Using primer, basecoats and additional coats

Ensure that a primer or waterproofing basecoat is used before applying the top coat of paint for desired paint performance.

Ensure that horizontal surfaces like top of windows, ledges and other horizontal surfaces are painted with an additional coat for greater protection.

Apply 2 – 3 coats of paint till you get the desired hiding or opacity.

Caring for your wall

Cleaning

For the best performance of the paint, ensure proper washing and cleaning of all algal & fungal growth at regular interval of six months.

Removing stains

For removing household stains of pencil, tea, coffee, crayons, turmeric, sketch pen etc, immediately use mild detergent solution with sponge to clean the stains.

Refer Product Info Sheet

Refer product information sheet to know about product details & ensure the product is applied with the right painting system & methodology.

Before painting, prepare the surface

Ensure that the surface to be painted is free from any loose paint, chalky/ powdery particles, dust, chalky or grease.

Surface imperfections such as holes, dents, fine cracks are to be filled with crack filler, before painting.

When not to paint - pay attention to weather conditions

Ensure not to apply paint in extreme temperature or humidity conditions or with poor ventilation. Avoid painting below 10°C surface temperature or/and at humidity greater than 90%.

Machine Finish: Spray Gun

Ensures premium finish as compared to current traditional method. Two coats of airless spray are required for darker shades. Saves time and labour.
