DIRECTIONS FOR USE

GET STARTED WITH YOUR PAINTING

CLEANING

FILLING
CRACKS

PUTTY

PRIMER

TOP COAT

SURFACE PREPARATION

Ensure that the surface to be painted is free from any loose paint, dust or grease. Growth of fungus, algae or moss should be removed by wire brushing and water.

SURFACE SMOOTHENING/CRACK FILLING

Asian Paints TruCare Wall Putty is recommended to level minor undulations and smoothen the wall surface. Asian Paints SmartCare Crack Seal is recommended for cracks up to 3mm in width.

PRIMER COAT

Before application of the topcoat, it is necessary to apply a coat of an exterior durable primer for better adhesion and to increase the durability of the paint. For fresh surfaces, we recommend Asian Paints SmartCare Primero. For re-painting, you can alternatively use Asian Paints TruCare Exterior Wall Primer.

TOPCOAT

Apply 2-3 coats of Asian Paints Ace by diluting 1 Litre with maximum of 750mL water or 2-3 coats of Asian Paints Apex by diluting 1 Litre with maximum of 400mL of water.

For best finish, use Asian Paints Trucare Roller 800 or Asian Paints Trucare Roller 580+
