SmartCare Damp Proof Advanced

Asian Paints SmartCare Damp Proof Advanced is a fiber reinforced elastomeric liquid applied waterproofing membrane. It is formulated with select elastomeric and resilient acrylic polymers and reinforcing synthetic fibers. Upon curing, it forms a thick, seamless, durable membrane thus offering ultimate waterproofing.

PRODUCT BENEFITS

Water proofing

Waterproofing protection of up to 7 bars of positive hydrostatic pressure

Crack bridging

Unmatched crack bridging ability due to elastomeric properties

High sheen

High sheen, brilliant white colour and thick coat results in high levels of heat reflectance

Adhesion

Strong adhesion to masonry substrates

Surface temperature reduction

Provides surface temperature reduction up to 10°C. This property is applicable for terraces

Use & maintenance

Single pack, easy to apply and simple re-coating

Mechanical strength

Reinforced with synthetic fibers for superior abrasion resistance

Anti carbonation

Damp Proof Advanced system has excellent CO2 diffusion (carbonation) resistance & prevents the corrosion of rebar within the concrete matrix, leading to superior structural protection

Warranty

10 years Waterproofing warranty on Terraces and up to 10 Years on vertical surfaces

(*Warranty years on vertical surfaces will depend upon top coat used, please refer to warranty booklet for more details)

WATER BASED

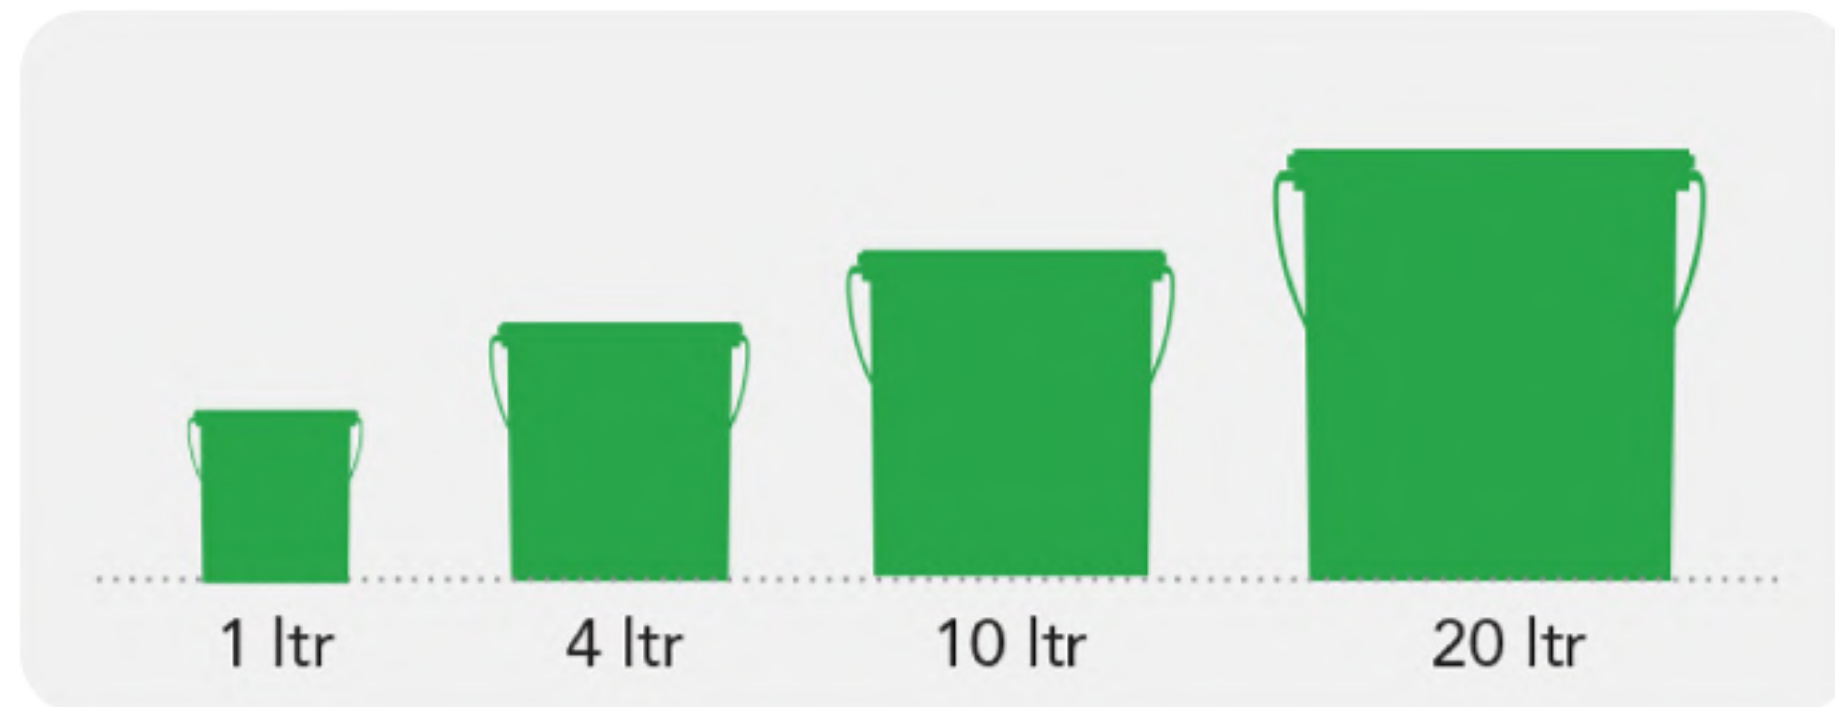

LEAD FREE* GUARANTEE

* All Asian Paints products contain no added Lead, Mercury, Arsenic or Chromium from April 2008.

**Surface temperature reduction: Temperature recorded from 1 pm to 3 pm with the aid of laser guided infrared non-contact thermometer, degree of surface temperature reduction will vary depending upon the surface & weather conditions

Vertical Surface
Fresh painting: 2.32 Sq. mtr/Ltr
Re-painting: 2.79 – 3.25 sq. mtr/ltr

RECOMMENDED USAGE

Can be used for building roofs, terraces, parapet, sunshades and exterior vertical walls. It can also be applied on existing IPS, sound brick-bat coba or cementitious waterproofing.

HOW TO APPLY

PRE PAINTING STEPS

PLASTER New masonry surfaces must be allowed to cure completely. It is recommended to allow 28 days as the curing time for new masonry surfaces. The roof must have positive slope/ drainage system to avoid water ponding at places.

CLEANING Surface should be free from any loose paint, dust or grease. Remove all existing bitumen coatings completely. It is recommended to use Intense wire brushing, High speed water jet and vacuum cleaner for thorough cleaning of the surface to avoid "Peeling off" problems.

REPAIRING The substrate must be checked for its soundness using small hammer. All cracks at corner joints, channels and parapets should be properly treated.

FILLING FOR CRACKS For filling cracks upto 3mm use Asian Paints Crack Seal. Bigger cracks, damaged portions and hollow areas must be repaired with polymer modified cement mortars.

1. As measured through a Ford cup. 2. Apply an additional coat of Damp Proof Advanced in case of severe dampness. 3. For best results, strictly follow the dilution and forced coverage requirements.

ADDITIONAL INFORMATION

POST PAINTING CARE

For the best performance of the paint, ensure proper washing and cleaning of all algal and fungal growth, if any, at regular intervals of six months.

PRECAUTIONS

- › Repair the hallow surface area before applying Damp Proof Advanced coat.
- › For miscellaneous surface like tiling, smooth and glossy cementitious surface, product should be used with Asian Paints SmartCare Terrace Tile primer.
- › For horizontal surfaces, use Asian Paints SmartCare Joints Tapes at all joints & corners for better reinforcement.
- › For oily, existing failure coating surface, carry patch tests to check adhesion of product to substrate.
- › The forced coverage leads to long term performance hence it is recommended to ensure coverage as per datasheet only.
- › Do not apply during rains or extreme temperatures.
- › Not recommended for rain water harvesting purpose.
- › Avoid abuses which may lead to puncturing of membrane.
- › Ensure that the product is applied at least 6 inches inside the drain pipe.
- › For best results, apply coating on parapet walls as well.
